

## LEADERSHIP meets IT Solutions

### Vanjure (van · jer) noun | verb

Both the company name and mission were derived from combining the words vantage and conjure. Vantage is defined as a place or position affording a good view. Conjure means to make something appear. Together it means to bring ideas into existence by providing strategic advantages with a comprehensive view of the results.

CAGE Code: 864F9

### CURRENT PARTNERS

Booz | Allen | Hamilton

*As a company, we strive to recruit people who have a genuine passion for the mission. By doing so, we reward them greatly.*

## WHAT WE DO

### Network Engineering

Vanjure can provide networking solutions such as instituting a layer two infrastructure that provides a high-capacity local communication capability or as complex as establishing a multi-tenancy enterprise network that maintains client partitioning across a hybrid cloud and on-premises.

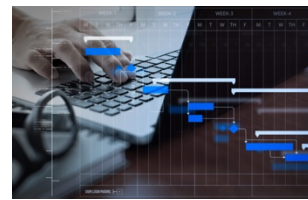

### Systems & Cloud Engineering

Vanjure work directly with IC customers to understand, improve, and modernize their complex cloud and on-premises hybrid workloads. We led the introduction to and adoption of AWS and Azure services to include IaaS, SaaS, and PaaS.

### Data Science & Analytics

Premier provider of cutting-edge analytic services, dedicated to addressing complex challenges faced by government entities. Our expertise spans from robust data ETL processes to the implementation of machine learning methodologies.

### IT Project Management

The discipline of projecting, planning, organizing, motivating, and controlling resources to achieve specific goals to meet specific success criteria. Expertise in managing complex projects using Agile and Waterfall methodologies and/or combination of both utilizing the customer's Project Management Framework (PMF).
